The screenshot shows the GitLab web interface for a merge request in a project named 'Project_3a'. The left sidebar contains navigation links: Project, Pinned, Issues (18), Manage, Plan, Code, Merge requests (2), Repository, Branches, Commits, Tags, Repository graph, Compare revisions, Snippets, Locked files, Build, Secure, Deploy, Operate, What's new (3), Help, and Collapse sidebar. The main content area has a top navigation bar with a search bar and icons for notifications, issues, and a user profile. Below this is a notification banner about email warnings for Project Owners and Maintainers. The breadcrumb trail is: CDIS / Computer Sciences / Courses / CS506 / SP2026 / Team / t_3a / Project_3a / Merge requests / 132 / Edit. The merge request title is: <!--Did you pair program? If so, create a sub-heading, tag them with "@username", and explain the breakdown of work.-->. The description contains three paragraphs of placeholder text: <!--Did you do any testing? If so, create a sub-heading and describe the testing.-->, <!--Did you do any research? If so, create a sub-heading link your research report. Describe how the information from the report helped you develop the code in this MR.-->, and <!--Did you do anything else you want to highlight? If so, create a sub-heading and describe the testing.-->. Below the description is a 'Switch to rich text editing' button. The 'Assignees' section shows 'Unassigned' and an 'Assign to me' button. The 'Reviewers' section shows 'Joseph Paul Prei + 4 more' and a note that '1 eligible member must approve to merge' with a link to 'Approval rules'. The 'Milestone' section shows 'Select milestone'. The 'Labels' section shows 'Select label'. The 'Merge request dependencies' section is empty, with a note to 'List the merge requests that must be merged before this one. Learn more.'

On April 6, 2026, some Project Owners and Maintainers will receive a large number of email warnings about pending Project deletions. See [this news article](#) for details.
